

AAUW Islip Area Hybrid Branch Meeting

FIGHTING CLIMATE CHANGE: LONG ISLAND'S OFFSHORE WIND ENERGY FUTURE

Presented by

Maureen Dolan Murphy, Executive Programs Manager
Citizens Campaign for the Environment

at

Bay Shore-Brightwaters Library and Zoom

MONDAY, NOVEMBER 15 AT 2PM

Many of us are experiencing and witnessing devastating impacts that climate change is bringing to our communities. Floods, torrential rains, and more frequent storm events are occurring across our coastlines. We can fight climate change by incentivizing the transition from fossil fuels to renewable energy. New York is a national leader on implementing offshore wind power. Currently, there are 5 offshore wind farms proposed for the Atlantic Ocean off Long Island's shores. These 5 wind farms will power over 2 million homes in New York with clean, safe renewable energy. Offshore wind allows New York to transition away from fossil fuel power plants and increase our reliance on renewable energy technology. Learn more about this historic change for our state and nation!

Zoom link will be sent before November 15
